

NavaX-Powered Quality Management System (QMS)

Quality Management System (QMS), powered by **NavaX AI**, provides a modern, cloud solution that combines best practices in quality management with the power of AI-enabled workflows and autonomous agents, to improve operational efficiencies, compliance, and quality management across the R&D drug development lifecycle.

Transform Quality Management with AI Innovation

NavaX-Powered Quality Management

Harness NavaX-powered intelligent automation and AI-powered decision support across the end-to-end quality management process.

Audit Capabilities

Make it simple to create, track, and approve audit plans, activities, agendas, reports, and more.

Quality Event Management

Streamline the management of deviations, complaints, non-conformances, out-of-specification results, and more.

Process Dashboards

Access flexible and easy-to-use dashboards that provide actionable quality process management insights.

End-to-End Process Support

Enhance key processes including CAPA, investigation and root cause analysis, change control, supplier qualification, and more.

Cross-Domain Interoperability

Move from data and workflow connectivity to cross-domain decision support via a common foundation of data, workflows, and AI-powered intelligence.

See the value of Quality Management System.

Powered by **NavaX™**

Efficiency Gains

Streamline key processes to improve team productivity and drive operational efficiencies in quality management.

Enhanced Decision-Making

Provide enhanced decision support and accelerate decision-making with connected, AI-driven intelligence.

Global Harmonization

Enhance cross-domain interoperability by bringing Quality, Regulatory, Safety, and Medical Affairs together in a single, connected ecosystem.

Digital Control

Implement standardized and controlled processes to increase inspection and audit readiness and eliminate uncontrolled workflows.
