

Documents

A Single Source of Truth for Regulatory Content

Documents gives you everything you need to manage submission relevant content and documentation up to submission readiness.

Key Benefits

Document Control

Ensure quality and consistency with common standards, pre-configured templates, and out-of-the-box compliance support.

Efficiency Gains

Save time by making it easier to author complex documents and streamlining common document management workflows and collaboration features.

Single Source of Truth

Simplify content management establishing a single, authoritative repository for submission relevant documentation which facilitates traceable reuse of documents across submissions.

Interoperability

Accelerate submission time and cross-functional collaboration via seamless integrations with third-party repositories.

Deliver real value
with Documents.
