

Labeling

More Efficient and Consistent Labeling Management

Labeling enables you to streamline your labeling workflows through end-to-end labeling change management and compliance tracking.

Key Benefits

Work More Efficiently

Increase productivity and reduce rework with streamlined and automated labeling management workflows.

Enhanced Compliance

Minimize regulatory non-compliance risk with enhanced control over labeling changes and their implementation.

End-to-End Management

Make it simple to manage, reuse, and control labeling data and documents throughout their lifecycle.

Greater Visibility

Gain added insights into labeling status and changes with enhanced compliance tracking.

Deliver real value
with Labeling.

Features

Process Management

Support local and global end-to-end labeling processes

Change Management

Support the review, tracking, and implementation of labelling changes.

Workflow Automation

Enable automated notifications and process triggers.

Cross-Functionality

Establish workflows that span processes and departments.

Downstream Integration

Seamless connection to the submission and approval processes connected to the end-to-end RIM workflow.

Dashboarding

Interactive dashboards for visibility into labeling changes and actions needed.
