

Product Compliance

Streamlined Product Lifecycle Management

Product Compliance enables efficient management and exchange of product data according to xEVMPD/IDMP requirements.

Key Benefits

Standardized Processes

Standardize product data governance and lifecycle management.

Single Source of Truth

Enable increased consistency and quality of data via a controlled and centralized environment for medicinal product data facilitating reuse, impact assessment and data updates.

Enhanced Compliance

Ensure adherence to agency requirements and compliance with xEVMPD and IDMP requirements without the need for technical knowledge.

Process Automation

Automate the creation and update of medicinal products as part of the overall RIM lifecycle.

Deliver real value with
Product Compliance.
