

Submissions

Accelerated Submissions Management and Publishing

Submissions consolidates submissions and publishing workflows in a single solution that makes it simple to create, compile, and publish submissions in any format.

Key Benefits

Streamlined Submission Management

Leverage built-in workflows that make it simple to create, compile, and publish submissions starting from a global submission package and automated compilation of national submissions.

Worldwide Compliant Publishing

Publish national submissions in any required format, including electronic and paper publishing in compliance with HA requirements.

Unified Solution

Drive efficiencies by bringing your submissions and publishing features as part of the end-to-end RIM workflow.

Reduce Rework

Build submission templates and regulatory knowledge to reuse across different teams and regions.

Deliver real value
with Submissions.
