

# Modernize PV Distribution Oversight with Agentic AI

Powered by  LifeSphere®  
NavaX

## Drive faster and smarter Safety distribution with autonomous compliance.

**Distribution Agents**, powered by **LifeSphere® NavaX**, brings unified, autonomous intelligence to Safety distribution and regulatory reporting, dynamically consuming the latest regulatory and partner/affiliate reporting requirements, validating them against existing distribution rules, and automating change governance to resolve identified discrepancies.

### Key Benefits

#### Increased Efficiency

Save time and effort in regulatory compliance by automating the tracking of requirement updates and their impact.

#### Enhanced Regulatory Compliance

Ensure compliance with new and updated regulators and PVAs by automating discrepancy management between existing rules and regulatory requirements.

#### Autonomous Oversight

Enable continuous self-updating, audit-ready regulatory compliance via Agentic AI-powered autonomous intelligence.

#### Confidence in AI Insights

Ensure full traceability and trust in AI-powered insights, including detailed and clear audit trails, reporting, and logic.

# Discover the value of Distribution Agents.

Powered by  LifeSphere®  
NavaX

## Seamless Integrations

Unify siloed safety datasets in a single analytical context to review all relevant evidence earlier and together.

## Case-Level Impact Assessment

Streamline impact assessment of rule changes by automating the identification of impacted cases and providing suggested remediation steps.

## Discrepancy Handling

Resolve issues faster by automating discrepancy management between existing distribution rules and the latest regulatory requirements.

## Notifications and Alerts

Ensure expedited and consistent compliance via automated notifications and alerts to users for relevant information and action items.

## Audit Trails and Reports

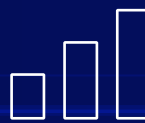

Ensure traceability in distribution rule updates with detailed audit trails and reporting for compliance and operational reviews.

## Rule Comparison

Mitigate compliance risk by automating the comparison of system rules against published requirements.
