

The future of safety intake automation has arrived.

Our new Advanced Intake offering is the industry's most advanced solution for automating the collection of safety data, revolutionizing the traditional approach to adverse event case intake.

Powered by NavaX™, the AI engine purpose-built for life sciences, Advanced Intake gives your teams seamless access to cutting-edge automation to streamline data collection from diverse sources.

Drive significant operational efficiencies and cost savings while improving compliance, quality, and patient safety and equipping your teams to transition into a more intelligently automated future.

The Case Intake Automation of Tomorrow at Your Fingertips Today.

Unmatched Efficiency Gains

Automate routine workflows across case intake and triage, literature screening, and global submissions to maximize productivity and cost savings that can be reallocated to value-adding activities.

6-8 Month Deployment

Accelerate time-to-value through our expedited deployment process, including availability of pre-validated, production ready automation to avoid extensive configuration and testing.

Enhanced Data Quality

Streamline the ingestion of structured and unstructured data from diverse data sources for greater data consistency with reduced risk of human errors, fatigue, and bias.

Trusted Automation Partner

As an industry leader in PV automation, we can show you where you will see value and map your automation journey to your unique workflows and strategic goals.

Format-Agnostic Intake

Ensure seamless ingestion of Safety data across multiple formats, including structured, semi-structured, and unstructured formats, to ensure all critical Safety information is captured at the point of intake.

System-Agnostic

Leverage open architecture and integrations with third-party safety systems to seamlessly implement case intake automation on top of your existing safety database.

Drive transformative outcomes with Advanced Intake

Powered by **NavaX™**

Next-Generation Capabilities

Leverage a solution powered by NavaX and the latest advancements in AI and automation, including robust GenAI-powered capabilities.

Proven Value

Achieve up to 65% increased intake efficiency with >90% data extraction accuracy using RPA and AI/ML that has been tested and proven through successful real-world cases.

Seamlessly Deployable

Deliver value sooner via pre-validated, production-ready automation that can be seamlessly integrated on top of your existing safety database in as soon as 6-8 months.
