

LifeSphere®

Advanced Signals

Powered by **NavaX™**

Advanced Signals, powered by **NavaX™**, sets a new standard in signaling innovation via a fully integrated, end-to-end signal and risk management solution, including advanced automation and analytics offered through **Signals Intelligence**.

It's time to achieve unprecedented speed and precision, cut through the noise, and proactively prevent safety issues for enhanced patient safety.

Redefine the impact of your signaling workflows.

Out-of-the-Box Automation

Process signals faster and with greater accuracy with out-of-the-box automation, including signal classification and management workflows.

Robust Signaling Analytics

Unlock deeper strategic insights using advanced product and comparative analytics for enhanced trend recognition and more focused evaluation.

Integrated Risk Management

Utilize a comprehensive, inspection-ready framework for risk management, including RMP management, RMM tracking, and commitment oversight.

Case Completeness Scoring

Enable next-level precision and speed in case and context evaluation with a robust scoring to help prioritize high-quality and well-documented cases.

Built-In Literature Review

Streamline literature review by automating the identification of relevant publications for signal detection, validation, and aggregate reports.

Fine-Grain Signal Detection

Ensure more accurate signal detection with support for a wide array of quantitative and qualitative statistical methods.

AI-Powered Signals Intelligence

Enable more efficient and insightful case and context evaluation with AI, using knowledge graphs to create visualizations between case attributes.

One Harmonized Ecosystem

Establish a seamlessly integrated, end-to-end signal and risk management platform, including out-of-the-box connectors to diverse data sources.

Discover the value of AdvancedSignals.

Powered by NavaX™

Unmatched Efficiency Gains

Accelerate signal management and benefit-risk evaluation via automated and streamlined end-to-end signaling workflows.

Cut through the Noise

Significantly reduce false positives by leveraging advanced automation tools and signal management methods across an array of data sources.

Ecosystem Harmonization

Reduce IT overhead and complexity by seamlessly bringing together your signaling solution with third-party systems and data sources.

Enhanced Patient Safety

Drive better patient outcomes with accelerated access to insights that can help you proactively prevent potential risks before they arise.
