

Transform MedDRA Coding with Agentic AI

Powered by  LifeSphere®
NavaX

Leverage AI that thinks, acts, and adapts like your pharmacovigilance partner.

ArisGlobal's groundbreaking **MedDRA Coding Agent**, powered by **LifeSphere NavaX**, is the industry's first-of-its-kind agentic AI technology built for pharmacovigilance. Transform how safety data is coded, analyzed, and delivered with AI that can understand clinical context, plan tasks dynamically, learn from reviewer feedback, and collaborate when appropriate.

Key Benefits

Unmatched Efficiency

Drive up to 80% efficiency gains by accelerating key MedDRA coding workflows and reducing reviewer workloads.

Enhanced Precision

Ensure higher confidence and precision via enhanced contextual awareness and explainable, auditable decision-making.

Intelligent Autonomy

Push beyond automation and move into intelligent autonomy with access to leading Agentic AI automation in PV.

Enterprise Readiness

Leverage AI that can readily scale across your global operations and be tailored to support your unique business goals.

Discover the value of our NavaX MedDRA Coding Agent.

Contextual Awareness

Go beyond simple text matching with Agentic AI able to understand underlying clinical meaning and intent.

Intelligent Cognition

Leverage AI that can autonomously perform tasks, understand your goals, and learn and evolve over time.

Continual Learning

Ensure value over time with AI that adapts in real-time to coding patterns, reviewer feedback, and enterprise-specific preferences.

Comprehensive Auditability

Provide clear traceability and explainability with AI that provides transparent reasoning in line with global regulatory standards.

Adaptive Collaboration

Streamline collaboration with AI that escalates only when necessary and provides ranked, rationale-based coding options.

Scalability and Flexibility

Expand readily across your PV operations with support for multiple languages, global regulations, and integrations with existing PV systems.
